This hydration system will help alleviate dry dehydrated skin by first eliminating dead skin cells and encouraging new cells to the surface, followed by a deep hydrating mask. Includes an easy-to-use Delicate Peel and Booster combo with gentle AHA's, a Biocellulose Mask for quick yet effective product penetration, and a superb exfoliating peel pad to scrub away those pesky dead skin cells. Get ready for a serious thirst quench for your skin!

Step 1: Tie back your hair if necessary. With dampened fingertips, apply a small amount of the Essential Milk to your skin and massage with gentle circular motions. Rinse with cool water and pat dry. Apply the Essential Toner on a cotton pad and sweep across the face and neck.

Step 2: Open of packet of Peel Pads. Use the pebbly side first to smooth away dead cells from the surface, then the smooth side to polish your skin. The single use Peel Pad is a fantastic way to exfoliate your skin with AHAs and Vitamin C. Use these for once or twice per week application to keep your skin glowing!

Step 3: Empty the Lactic Acid Peel Booster sachet into a small dish and use one swab to apply the Booster evenly starting at your forehead, rolling the AHA onto your skin as you move downwards. You may include your brow bone, but avoid your eye lids, leaving an oval around each eye. Include the sides of your face, nose, jawline and neck and leave an oval for your mouth. The Peel Booster stays on for 5 mins; do not rinse off.

Step 4: During the time your Peel Booster is on, prepare your Delicate Peel by mixing both sachets of Vitamin C and AHA in the same small dish. After 5 mins is done and using the second swab, apply the Delicate Peel in the same manner as the Booster. Wait for 10 mins. It is normal to feel tingling during both steps of the peel. Once the 10 minutes has passed, rinse with cold water.

Step 5: Unwrap your Water Source Sheet Mask and remove the protective layer of the mask so you just have the biocellulose film left. Apply the mask to your face, fitting the cutouts for the eyes and mouth to your own. Leave on for 15 mins. The mask adheres very well so you can sit while it's on or enjoy the full relaxation effect and lay down! No need to rinse after removal.

Note: your bio-cellulose mask is 100% biodegradable.

Step 6: Finish your treatment with a small amount of Hydramemory Serum and Hydramemory Cream. Press the serum first into face and neck and follow with the Moisturizer.
